Jannie Brisseau, Cecile Jugla : Children (Around the World) before purchasing it in order to gage whether or not it would be worth my time, and all praised Children (Around the World):

Young children will be introduced to the world in Barron's new pictorial encyclopedic series called Around the World. These illustrated books contain page after page of colorful pictures that tell the story of the world in a way that children will understand. The Around the World series is being introduced with two books, Animals and Children, by Jannie Brisseau. In each of these attractive volumes, children learn about living creatures that exist worldwide. This illustrated mini-encyclopedia takes a delightful look at children from all over the world. This Around the World book shows young readers the differences and similarities between their lives and the lives of children from Japan, China, Germany, Sweden, New Zealand, and many more. The illustrations in both Children and Animals are rendered in a naturalistic style, and the captions are written specifically for young readers. The Around the World series will take

children on an exciting, unforgettable journey across the globe.
