He is 11 but it is great for all ages. I love this line of books, they are not just encyclopedia's, they are packed full of fun facts and amazing twists and turns. They are loaded with information, not just information but fun, interesting information. Every thing is laid out in a way that kids can understand with vibrant colorful illustrations/photographs. My kids cannot get enough of these books. We home school and I can use them for our classes and the kids want to jump ahead on their own to just sponge up everything in one sitting. These are fun whether you home school or not. Each book is written by a different author, but don't let that make you apprehensive. They are all fantastic books and fun not just for kids but for everyone. Our whole family enjoys them. I cannot give you a big enough "Thumbs Up" on these wonderful books.

***** Stars from this Mom and teacher!!0 of 0 people found the following review helpful. Good illustrations. Beware that your 4 year old child ...By PatsfanaticVery thorough book for your Pre-School dinosaur fanatic. Good illustrations. Beware that your 4 year old child may memorize all of the dinosaur facts in this book; i.e. species, family, order, time period, and where they roamed. Good tool to teach taxonomy to a pre-schooler.0 of 0 people found the following review helpful. Five StarsBy LillianMy child loved it. It's like new!

A reference on dinosaurs for children. It contains all the information the young reader needs to understand the story of the dinosaur. Easy-to-follow coding on each section allows access to information and catalogue spreads provide facts and figures. Illustrated feature spreads concentrate on the specific questions most asked about these amazing reptiles.
