We finished all 11 chapters in one semester.OVERALL THOUGHTS: I found it to be very helpful and easy to power through.CONNS:In each chapter, there is a set of main vocab as well as supplementary vocab. I found that some supplementary vocab from the earlier chapters were repeated in the later chapters as the main set of vocab.At the back of the book is a chinese-english

dictionary and vice versa. However, I feel that the dictionary could be more extensive as they were missing some vocabulary that was used in the book. PROS: You learn a lot of Chinese surnames in this textbook. A lot of helpful conversations are littered throughout the book. There are also a few chapter reviews. At the end of each chapter, there are sections about Chinese culture. Prior to chapter one, there is a brief section on pinyin. 0 of 0 people found the following review helpful. Effective textbook By Poon L. Yee I needed this textbook for my Chinese class. I feel that the textbook is really awesome and when paired up with the student activities manual and the character book it really works. I like the passages in the textbook and the fact that there are traditional and simplified characters in the beginning when it is introducing the new characters to the readers. By doing this, people that write in simplified and traditional at least can recognize the other way of writing the character - simplified or traditional. I like this textbook a lot more than some of my other Chinese textbooks that I have had previously. 0 of 0 people found the following review helpful. It's OK. For a class so I had no choice but to buy it. By Annette M. This is the text book for a Mandarin class I am taking. It is just OK. The audio resources are only available online unless you buy the audio cd's separate or pay \$149 for MyChineseLab. They are in Flash so they don't work on a mobile device and you can't even download them as MP3's

Chinese Link, 2e provides a practical, learner-centered and enjoyable language and cultural learning experience for beginning students of Chinese, as well as an efficient and comprehensive teaching resource for instructors. This best-selling text takes care to introduce and explain grammar points clearly and systematically, yet not in a fashion that would be overwhelming to beginners. In keeping with the communicative focus of the text, grammar points are related to communicative task-oriented content. The textbook presents both traditional (complex) and simplified versions of Chinese characters, since learners will encounter both forms during their course of study or in travel abroad. Photographs and drawings make the text vivid and eye-catching, and to provide visual cues to aid in communicative exercises and activities. And the Video Program to accompany the Language in Use sections enhances the in-text dialogues by presenting them in authentic settings.

Chinese Link is by far the best structured and sequenced textbook I have ever seen with a scope covering all necessary structural and communicative elements for elementary Chinese. I am a strong supporter for this practice to combine pinyin with characters in first year textbook since it will give learners immediate hints about the pronunciation of characters which are totally foreign to English speaking Chinese learners. The video for Language in Use is great! The video presentations impressed me greatly in that with its authentic settings and naturally occurring communicative activities, they will not only help learners outside class but also in class. Wenze Hu Ph.D., Assistant Professor, US Naval Academy Given students beginning level of proficiency in Chinese, the accompanied Pinyin would be a welcome service to the students who can then focus better on the sentence structures involved. This is a great textbook with an integrated approach for developing students overall linguistic and communicative competence. The Culture Link sections are what make this book different from other traditional textbooks. I find the audio resources on this Companion Website wonderful and they should be taken advantage of by all who use the textbook. I love the video presentation of this textbook. I think it tremendously enhances the dialogues and the texts because of quality of the pronunciations of the cast who acted out these texts.
