ITS A RIP OFF!!By Daniell I went to the store to buy this book. I was attracted to it because of the cliff notes brand and the fact it had a simple and clear study plan mapped out for 2 months, 1 month, and a week. That is all there is positive to

say about this book. There are so many glaring errors in the answers for math problems, it amazes me that it ever passed the proofreader's desk. If I was the publisher and author of this book I would be extremely embarrassed that this book had my name on it. I will never, ever again buy a cliff notes book because of this sorry attempt at a book. I have spent three weeks studying from this book and I am beginning to think that there may also be mistakes in the chapters, not just the answers. I am less than a week away from taking the GRE and I have realized I have made a horrible mistake by purchasing this book. I hope that it will not affect my score too significantly. I just wish I could get my time and money back. Do yourself a favor and buy a Kaplan book. They are way more thorough and professional than this book and they offer a money back guarantee if you are not completely satisfied with their product.
