Jerry Bobrow Ph.D. : CliffsTestPrep GMAT AT (Computer-Adaptive Graduate Management Admission Test) (Cliffs Test Prep GMAT CAT) before purchasing it in order to gage whether or not it would be worth my time, and all praised CliffsTestPrep GMAT AT (Computer-Adaptive Graduate Management Admission Test) (Cliffs Test Prep GMAT CAT):

Additionally, the math questions have many, many typos (for instance, they use a '+' instead of an '=' in the question), so it is impossible to know how to answer the

questions. I didn't bother carefully reviewing the verbal section, because I was so disappointed with the math. I would recommend this book, only if you need additional practice math problems, and typos don't drive you crazy. I highly recommend the actual book from ETS and Kaplan books (the other 2 I used) for studying for this exam. (Also Elements of Style by Strunk and White may also be useful to you.) 0 of 0 people found the following review helpful. More harm than good By Another reader I bought this book in preparation for the GMAT exam. While the tips on how to solve some of the quantitative problems are valuable, they can be found in other books. The serious problem with this book is that the practice problems in both the verbal and quantitative sections have numerous errors. You will not learn anything from this book and it causes more harm than good. I returned it to the store (not bought from) shortly after purchase. You'll do better off sticking with the Kaplan guides or the GMAT Official Guide 2 of 3 people found the following review helpful. Don't waste your time By wahaha I spent 30 mins in reading part of the verbal section in this book. I regret that I should spend my precious time on somewhere else. The book just simply gives you the answer to the question without too much explanation for each answer choice. Moreover, the explanations are poorly written and organized. I have returned the book to the store right away.
