Great perspective on the college search process, really helpful. It made me relook at our fundamental criteria for schools as we were considering Ivy League schools for me son. I also loved the updates 10 years later. Examining what the graduates actual outcomes are is very valuable. Who wants to send their child to a school where they might not have marketable skills when the graduate, if they graduate at all.

Liked it. Also found a website on niche that gave a lot of good info. This book includes my alma mater, which I really agree was a college that could change lives. In the past few years though, it has been all over the news because of it's stance against gays and it's inclusive issues with diverse faculty. I'm wondering if it's time to update this book.
