**Michael Chinery (ed) : Collier's Illustrated Encyclopedia of Animals: From Aardvark to Zorille - and 2,000 other Animals** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Collier's Illustrated Encyclopedia of Animals: From Aardvark to Zorille - and 2,000 other Animals:

This encyclopedia spans the Earth from Pole to Pole, embracing creatures in all the natural communities that make up

the great world of animals, in four volumes. Birds, insects, reptiles, amphibians, mammals -- every animal group is included. Besides the individual entries, there are over a thousand color pictures captions, dozens of short articles about animal behavior. Sections at the end of each volume include: glossary; alternative names additional cross-references; extensive index. Good Housekeeping calls this set "a must for any home library."
