Clearly the dhatu-roots from Sanskrit came from somewhere and Mr. Rendich has done lots of valuable work and he has yet more to do. 4 of 10 people found the following review helpful. One Star By J. Wood This is the worst kind of folk-etymological nonsense. No surprise he had to publish it himself.

History of the words of the most ancient Indo-European vocabulary, which came into being thousands of years before the flowering of Greco-Roman civilization, and their transcription in Sanskrit, Greek and Latin. 15,000 entries.

About the Author The author was born and raised in Venice and continues to live there. In 1998, he published *Gli Indoeuropei e le Acque* (The Indo-Europeans and the Waters), which was put out by Editoria Universitaria. In 2005, Palombi Editori published his *l'Origine delle lingue Indoeuropee. Struttura e genesi della lingua madre del sanscrito, del greco e del latino* (The Origins of Indo-European Languages. Structure and Genesis of the Mother Tongue of Sanskrit, Greek and Latin) in which he describes the constructive method followed by Indo-European grammarians in the formation of the verb roots of their first language and, over the course of 13 chapters, he describes how the hymns of the Rg-Veda reveal to us that, in the original homeland of our progenitors, the solar year was made up of only seven or eight months, thus confirming the theory posited by G.B. Tilak in his *The Arctic Home in the Vedas*. Now, in this dictionary, the author re-evokes the sounds of ancient Indo-European words that have given life to a culture without equal.
