By lolafh14 My mom is a master gardener and recommended this book to me when I purchased my first home and wanted to begin composting. This book provides very accessible information for a novice composter. 7 of 7 people found the following review helpful. Perfect base to start from... By haibler Hello all. Except for a few omissions of

important names such as Rudolf Steiner, Ehrenfried Pfeiffer or Ernesto Genoni in the "history" section of this book on Compost, I must state, that this book offers a perfect hands-on starting platform for beginners of organic gardening and the art of composting being at the very heart of it, gets well explained. I know what I am talking about since all I do is trying to keep my 300+ acre "garden" going and growing.... ;-)Thanks.

Recently selected by gardening doyenne Beth Chatto as one of her top twenty gardening books of all time, this invaluable book demystifies the art of composting. House Garden gardens editor, Clare Foster, shows you how to build a compost box, select the best ingredients and put the resulting organic compost to the best use in your outdoor space. By taking some dead leaves, grass cutting and old banana skins and enlisting the help of bacteria, insects and nature, you can improve and enrich your soil, feed your plants and nourish your vegetables, restoring the natural balance of life in your garden

Together with the benefits that well-made compost provides, the practice of compost-making becomes as fascinating as the practice of gardening itself. -- Beth Chatto  
About the Author  
Clare Foster is gardens editor at House Garden magazine, and was previously editor of Gardens Illustrated. She has contributed to the Sunday Times and the Guardian newspapers, and is the author of *Your Allotment* (2007).
