**Adam Haeder : Conducting the Network Administrator Job Interview: IT Manager Guide with Cisco CCNA Interview Questions (IT Job Interview series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Conducting the Network Administrator Job Interview: IT Manager Guide with Cisco CCNA Interview Questions (IT Job Interview series):

0 of 0 people found the following review helpful. Good ResourceBy Michael E. From TexasI bought this book specifically for the Cisco networking interview questions. It has a good set of questions to help assess various

interviewing candidates. I recommend this book to hiring managers.0 of 0 people found the following review helpful. Conducting the Network Administrator Job InterviewBy FranI would recommend this book to anyone in preparation for this type of interview. It really put me on track.1 of 1 people found the following review helpful. Excellent Network interview questionsBy Donald BurlesonThis is an excellent text for any IT manager. I was impressed with the coverage for the pre-interview stages and how you can identify those job candidates that are most-likely-to-succeed in the job role.Better still, I was impressed with the job interview questions. They are designed for a telephone interview, and the IT manager can just ask the questions and compare the responses to the "ideal" answer.Overall, this book is a real timesaver for anyone hiring a Cisco or Ethernet Network Engineer.

Offering accumulated observations of interviews with hundreds of job candidates, these books provide useful insights into which characteristics make a good IT professional. These handy guides each have a complete set of job interview questions and provide a practical method for accurately assessing the technical abilities of job candidates. The personality characteristics of successful IT professionals are listed and tips for identifying candidates with the right demeanor are included. Methods for evaluating academic and work histories are described as well.

About the AuthorAdam Haeder is a network administrator and Linux technology expert. He is a vice president at the Association for Information Management Institute and is a Linux Certified Administrator, a Cisco Certified Networking Associate, and a Cisco Certified Academic Instructor.
