A great GuideBy A. GusbarAs usual, Consumer Reports does an excellent job of providing information about used cars. Unlike the Consumer Guide on used cars, Consumer Reports accepts no funding from car manufacturers. Consumer Reports gives a non-biased, excellent source of information. We have already bought one car according to their suggestions and the car has been the best car we have ever had!12 of 14 people found the following review helpful. Not only for car loversBy assafThe new CR guide, like the CR's other releases, is a very useful car guide, aimed not only for car lovers - but to nearly

anyone who has anything to do with cars. When I look for a used car, the main issue for me is Reliability. Almost anything I need to know about it is in that guide. A great tool I had last year - when I bought a car - was the beautiful CR 1998 guide. This one is even better. With history about the car makers and a short review about each model - I have more than I need to know. And there is more. As a car owner, I fully respect the CR's tips about maintaining the car. Words about tires, breaks, safety features etc. are completing the bargain. A recommended magazine for car lovers, and a great tool for the rest.

The Consumer Reports Used Car Buying Guide gives you a comprehensive guide to more than 200 models, from Acura to Volvo.
