We Know the GRE CATThe experts at The Princeton Review take the GRE CAT and other standardized tests each year to make sure you get the most up-to-date, thoroughly researched books possible. We Know StudentsEach year we help more than two million students score high with our courses, bestselling books, and award-winning software. We Get ResultsStudents who take our six-week GRE course have an average score increase of 212 points (verified by

International Communications Research). The proven techniques we teach in our course are in this book. And if it's on the GRE CAT, it's in this book. Acing the computer-adaptive GRE is very different from getting a 4.0 in college. We don't try to teach you everything there is to know about English, math, or analytic thinking. We just tell you what you need to know to score high on the GRE CAT. There's a big difference. In *Cracking the GRE CAT*, we'll teach you how to think like the test-makers and:
Eliminate answer choices that look right but are planted to fool you
Solve GRE CAT analogies when you're not sure what all the words mean
Master the vocabulary words that most often appear on the GRE CAT
Solve GRE CAT algebra problems by plugging in numbers in place of letters
This book includes over 200 simulated computer-adaptive test questions. The questions in this book are the same sort of problems you'll see on the actual GRE CAT, and we fully explain every solution. This book also includes two full-length sample GRE CATs on a Windows and Macintosh CD-ROM. Quick feedback--predict your GRE CAT score instantly.
