Have you always thought you were in the wrong career but not sure how to change? Are you confused by what you actually want to do? Do you want to wake up on a Monday excited about going to work? Then youve come to the right

place. Creating Your Classic Career shares tools, tips and insights to help you to achieve your career aspirations. This short guide takes you through the processes needed to help you secure your dream career, including strategies to help you decide what you want to achieve through employment, career writing tools, interview tips and techniques, career fears and real life case studies to make this a little less daunting. In todays society, we spend more time with our employers than we do with our families. This is why I believe it is so important to enjoy your career. After all, its a long time until retirement! Ive written this book to help and inspire others as I was in the same situation myself for many years. I went from job to job not feeling totally satisfied with what I was achieving. It's about finding the confidence to search within yourself to find out what you want to do, rather than what you should be doing. I've found if that is perfected, everything else in your life will follow the same path. Happiness in your career is key.
