It makes the children think about how animals are alike and not just which classification they belong to or where they live. It is well written and has some interesting thoughts. There are some less familiar animals and the children can look for further information. This is a book to make children think about things/ animals differently. If they want a textbook, they have those as well. This is strictly fun. 0 of 0 people found the following review helpful. creative categories for the featured animals. My children enjoy the book not only for the scientific knowledge but also as a guide for artistic renderings of the various animals. The volume has a nice heft to it but is sized appropriately for smaller hands. 0 of 0 people found the following review helpful. MehBy K The illustrations are cute, but other than that this book has nothing else of substance. I wouldn't have bought it if I had seen inside.

Welcome to this collection of best-loved animals from all over the world, chosen for their special talents and characteristics, with fun illustrations by Adrienne Barman. Meet 'the architects', the 'noisy neighbors', the 'homebodies', the 'forever faithfuls', the 'champions of forgetfulness' and more in this alphabetically ordered encyclopedia. Filled with fascinating facts, curious creatures, and characterful cartoons, this book will keep young explorers busy for hours.
