Mary Wilbur If you are interested in critical theory, this is the book for you. It covers the most important concepts in full and with clarity. It also caused me to absolutely hate critical theory (theories). They are nothing but the fantasies of academics, who have never lived a real life in the real world.

Critical Theory: The Key Concepts introduces over 300 widely-used terms, categories and ideas drawing upon well-established approaches like new historicism, postmodernism, psychoanalysis, Marxism, and narratology as well as many new critical theories of the last twenty years such as Actor-Network Theory, Global Studies, Critical Race Theory, and Speculative Realism. This book explains the key concepts at the heart of a wide range of influential theorists from Agamben to iek. Entries range from concise definitions to longer more explanatory essays and include terms such as: Aesthetics Desire Dissensus Dromocracy Hegemony Ideology Intersectionality Late Capitalism Performativity Race Suture Featuring cross-referencing throughout, a substantial bibliography and index, *Critical Theory: The Key Concepts* is an accessible and easy-to-use guide. This book is an invaluable introduction covering a wide range of subjects for anyone who is studying or has an interest in critical theory (past and present).

About the Author Dino Franco Fellugais Associate Professor of English at Purdue University. In addition to authoring and editing print books, he created the online *Introductory Guide to Critical Theory* and *BRANCH: Britain, Representation and Nineteenth-Century History* (branchcollective.org).
