National Geographic Maps - Reference : Cuba Classic [Tubed] (National Geographic Reference Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cuba Classic [Tubed] (National Geographic Reference Map):

0 of 0 people found the following review helpful. This was an excellent laminated map without a lot of "touristy" illustrations or ...By LenThis was an excellent laminated map without a lot of "touristy" illustrations or other junk. Just a really good detailed map of the country. Graphically beautiful and a really nice size. I couldn't have found a better map. I highly recommend it.0 of 0 people found the following review helpful. I bought this to use as a guide while in ...By Julia MiraI bought this to use as a guide while in Cuba. With the aid of the map and two guidebooks, we only got lost occasionally. It's now on the wall. I didn't know whether to trust the map or the guidebook on occasion, because they didn't always match.0 of 0 people found the following review helpful. Damage upper right sideBy ceciliaSignificant damage upper right side was going to get the map framed as a gift to my grandfather who is from Cuba as a gift but it's honestly not worth it at this point

National Geographic's signature Classic style map of Cuba uses a bright and vibrant color palette featuring stunning shaded relief and ocean bathymetry. Pinpointed on the map are thousands of cities and towns, national parks, mountains, swamps, coral reefs and islands of the archipelago. In addition, major infrastructure networks are displayed, including highways, roads, railroads, oil fields and pipelines, airports, canals and ferry routes. Jamaica, the Cayman Islands, the Florida Keys, and most of the Bahamas and Haiti are shown, along with the Gulf of Mexico, Caribbean Sea, Atlantic Ocean and Straits of Florida. A user friendly index shows the English translation for many geographic terms. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:1,500,000 Sheet Size = 36" x 24"

About the AuthorFounded in 1915 as the Cartographic Group, the first division of National Geographic, National

Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
