Michael Roaf : Cultural Atlas of Mesopotamia and the Ancient Near East before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cultural Atlas of Mesopotamia and the Ancient Near East:

0 of 0 people found the following review helpful. Good Overview By judy I enjoyed this book, and plan to peruse it often. I purchased an inexpensive used copy, and it was in good condition. It is an Atlas, as titled, with plentiful artifact and architecture pictures, maps, etc. on almost every page. The timeline starts in Epipaleolithic and goes through the Iron Age. The text provides a lot of fairly detailed information about the Sumerian, Babylonian and Assyrian cultures and history without being overly tedious. 0 of 0 people found the following review helpful. transcendant By Beans Feels more like a collection of the history in the near east. Beautiful pictures. 1 of 1 people found the following review helpful. Good introduction to ancient middle east culture By B. Nankivell This is a readable and informative review of our ancient heritage. Even though the civilizations discussed are 3000 to 5000 years old - many of their ideas have come down to us - although in a transmuted sense and changed through many generations. This is a good introduction to the peoples and culture that predate the Greeks, Romans and Egyptians: where western civilization

usually starts its history.

An exploration into the geography, history, archaeology and anthropology of the Near East from pre-history to 330 BC. Coverage includes early farming, the move towards civilization, the urban explosion, warring states, trade, international empires and conquerors from East and West.

From School Library JournalYA-- A beautiful, well-researched, informative study of the geography, history, archaeology, and anthropology of Mesopotamia and the Near East. Divided into "Villages," "Cities," and "Empires," the book is an excellent survey of this ancient region of the world. At intervals throughout the book, special topics and archaeological sites are featured, described, and illustrated. Some of the topics include the origin of writing, ivory carving, and Mesopotamian warfare. Jericho, Babylon, and Ur are among many archaeological sites that are given detailed explanations. Excellent full-page maps and a wealth of full- color illustrations add to the reference value.- Nancy Bard, Jefferson Sci-Tech, Alexandria, VACopyright 1991 Reed Business Information, Inc.
