It is written in a way that a 10th grader can understand it and is appropriate for people who need the most basic guidance and common sense they perhaps didn't pick up through life experience or from their parents. Otherwise, this isn't a book for professionals, and probably not even college educated job seekers. It is simply too basic, like teaching how to fry an egg or how to tie your shoes. 1 of 2 people found the following review helpful. Fun, Valuable Job Finding Tool! By Ruth H.
