Didn't care for it!

In Darwin's Fishes, Daniel Pauly presents an encyclopaedia of ichthyology, ecology and evolution, based upon everything that Charles Darwin ever wrote about fish. Entries are arranged alphabetically and can be about, for

example, a particular fish taxon, an anatomical part, a chemical substance, a scientist, a place, or an evolutionary or ecological concept. The reader can start wherever they like and are then led by a series of cross-references on a fascinating voyage of interconnected entries, each indirectly or directly connected with original writings from Darwin himself. Along the way, the reader is offered interpretation of the historical material put in the context of both Darwin's time and that of contemporary biology and ecology. This book is intended for anyone interested in fishes, the work of Charles Darwin, evolutionary biology and ecology, and natural history in general.

"...an engaging [and] entertaining book with useful details..." Trends in Ecology and Evolution "[A]n eclectic, scholarly reference work, rich in historical content and chock full of interesting quotes and insights from Darwin and Pauly alike." Nature "Darwin's Fishes: An Encyclopedia of Ichthyology, Ecology, and Evolution, by Daniel Pauly, is a unique and insightful analysis of Charles Darwin's contributions to ichthyology and to evolutionary biology in general. I highly recommend this book as an enjoyable way to become reacquainted with the original writings and thoughts of Charles Darwin, and to perhaps appreciate for the first time his significant contributions to ichthyology." ECOSCIENCE, Randal J. Snyder "Provides a useful historic source." American Reference Books Annual "An erudite hobby turned reference work, Darwin's Fishes brings together all of Charles Darwin's scattered remarks on all kinds of fish... Daniel Pauly reproduces and discusses relevant passages from Darwin's notebooks, letters, papers, books and marginalia" Gregory Radick, Book s, ISIS About the Author Daniel Pauly is a tenured Professor at the Fisheries Centre, University of British Columbia, Vancouver, Canada. He has written over 400 articles, books and papers.
