Delorme : Delorme New Hampshire Vermont Atlas Gazetteer (Delorme Atlas Gazetteer) before purchasing it in order to gage whether or not it would be worth my time, and all praised Delorme New Hampshire Vermont Atlas Gazetteer (Delorme Atlas Gazetteer):

By roadtripperI was expecting to be disappointed by this map because for decades, New Hampshire and Vermont were two separate atlases. The 2015 edition is the first time the two states have been combined into one. Here is what has happened:
THE GOOD- colors are awesome and are a huge improvement over previous editions. I'm very thankful for this.- the northern NH roads and roads in wild/remote areas have generally been significantly improved- names of many streets have been added (although many were also removed - see below)
THE BAD AND AWFUL- over 75% of the waterfalls listed in the previous editions have been removed (this makes no sense to me)- more than 50% of the zoomed-in city/town maps of the previous editions have been removed, including the busy tourist town of Manchester, Vermont (this was a huge disappointment)- more than 50% of the small streams/brooks have had their names removed (this makes no sense to me)- many major tourist attractions still are not listed (how on earth is Diana's Baths and Santa's Village STILL missing from these maps?)- many small streets in rural areas have had their names removed (another huge disappointment)
Garmin bought the DeLorme company a few years ago and I'm hoping a major overhaul of these maps takes place. There is a lot of room for improvement. Overall, this map gets a C/C+ whereas previous editions were B-.

By DKWBCombining VT and NH was a big mistake. Can't see the level of detail that we would like. If topography is important we need to have it at the 1:100,000 level if not much higher resolution than that. DeLorme... do as good a job as Benchmark Arizona Road Recreation Atlas - 7th edition and I'll buy all 50 states....

By DuderMaguderThis atlas worked great during our trip to NH. You think, "Nah, I don't need an atlas since I have GPS." Wrong. There are many areas in NH where cell coverage is sketchy at best. We used this book quite a few times to find our way. Definitely worth the price.
