We ended up picking up names for two of our kids. 1 of 1 people found the following review helpful. Five Stars. By Customer Very Good! 7 of 8 people found the following review helpful. Good Reference. By SRINIVASA RAO BATCHU This book is a good collection of Sanskrit names and their meanings from various contexts and commentaries. I don't think this is a complete collection of all the

remarkable names that exist in this great language. Many of the missing names(?) that can't be found in this book are from Yoga itself. This is a good reference book and the authors did good job in compiling the names. I was disappointed to find that a book from Yoga Institute does not have complete resource of the names of Yoga itself in this book.

This long-awaited dictionary provides an extensive list of ancient, beautiful Sanskrit names, along with their significance and spiritual meanings. Numerous references to the classical scriptures of India are included to help in research and further study of a name. The spiritual qualities associated with each name, such as particular aspects of God, character traits, and spiritual virtues are highlighted with cross-references to other names having the same quality. The Dictionary of Sanskrit Names is very helpful in naming babies, understanding spiritual names, and as a resource book on Hindu mythology for scholars and researchers.
