**Sarah Phillips : Dinos (Mini Encyclopedias)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Dinos (Mini Encyclopedias):

0 of 0 people found the following review helpful. Provided all the information my daughter was looking for. By K. Bernard I purchased this as gift for my 9 year old daughter. She seemed to like it better than the Sea mini encyclopedia I purchased. It served as about 30 minutes of great family time. She read it cover to cover, as did my husband and I. It delivers what it promises, a nice dino mini encyclopedia. It is the size of a child's chapter book. It doesn't have tons of pages like regular encyclopedic but for my daughter it delivered all the information she wanted. She is not a dino buff,

she was looking for basic information, which this did provide that along with interesting facts that entertained even my husband and I. Several weeks after getting this book, her interest grew in dinosaurs and she rented quite a few library books at school on dinos that were in the book that none of us had ever heard of. This is a great low budget purchase. I would buy more from this series for that purpose. It delivers the information you expect it would. 0 of 0 people found the following review helpful. Great! By Benjamin S. Rogers 4 year old loves it 0 of 0 people found the following review helpful. My son loves this book By Gusdianto It is small, easy to carry, have nice pics. not too complicated but have enough information for 4 yo. he even bring it to his school and show it to all his friend :)

The Mini Encyclopedias are an exciting new range of first reference books for young children that's packed with interesting facts and beautiful photography. Using dramatic photography, simple text and annotated diagrams, these books will fascinate and engage children as they learn about their favorite topics. With fun facts and a glossary of terms, children will enjoy exploring and discovering more about amazing animals, the human body, nature, weather and life on our planet!
