Buy this book and save yourself from making mistakes on one of your most important decisions-careerBy TKOK so I maybe too old for doing this personality test but I've always known I'm in the wrong career field. In fact, I can't even call it a career- It's a job (grateful to have a job but still). Anyway, taking the test I now understand that my personality is polar opposite to my job. This doesn't mean I'm not capable of doing my job just that it takes more out of me than what I get back. I'm a square peg trying to fit in a round

hole. Whether, I can change jobs this late in the game remains to be seen but I don't feel guilty about feeling this way anymore. I think anyone who is about to go off to college, feels unfulfilled at work, or just doesn't know what direction to go in would benefit from this book. I think I would have taken the advice and changed my major in college. 3 of 3 people found the following review helpful. Excellent insight!

By Nani Nassar I am 21 years old, and currently in the process of a career change. I have been studying for several years, and the 2 careers I have chosen were definitely a mistake. This book arrived 2 days ago and by today I have totally devoured it. The clear and explicative way it is written in, and the amazing insight it gives towards career decisions is outstanding. Not only do the authors guide you through the best career paths for your personality type, and your strengths and weaknesses, but they go a step further and describe many, many other areas of life and the way you approach people and situations. Everything I have read so far is spot on, even the career choices that have been recommended to me. I know feel less frightened and nervous about my future; this book has given me many tools in this process of deciding something that will fulfill me for the rest of my life, and in all the other areas of life. The only con is the fact that the last edition of the book was printed on 2007. It would be amazing to see an updated version of the book with all the new careers that technology and scientific advances have created in the recent years. Regardless of this, I recommend this book 100% for anyone who is thinking of a career or a job change.

0 of 0 people found the following review helpful. Very insightful "people" book!

By Vicky Flint If you enjoy people, and love learning what makes different people tick (or why some people are so "weird"), this is the book for you. Beyond just Meyers-Briggs testing, the authors go into other nuances of personality to give further insights. Two people who have the same personality type are still different and unique because their temperaments can be different. Many personality typing systems tend to put people in a "box." The problem with that is, we don't fit into "boxes." Life events and various circumstances bring out different elements of our personality, and can change us. This book takes those things into account. A friend let me borrow her copy of this book. I had to buy one so I can mark it up! I see my friends and family members in its pages and will be sharing some insights from the book with those who are unhappy with their jobs/careers and can't seem to find their next pursuit.

The bestselling guide to finding career success and satisfaction through Personality Type is now thoroughly revised, expanded, and updated. *Do What You Are* -- the time-honored classic that has already helped more than a million people find truly satisfying work -- is now updated to include jobs in today's hottest markets, including health services, education, and communications technology. With the global economy's ups and downs, the advent of astonishing new technology, the migration to online work and study, and the ascendancy of mobile communication, so much has changed in the American workplace since this book's fourth edition was published in 2007. What hasn't changed is the power of Personality Type to help people achieve job satisfaction. This fifth edition is especially useful for millennials and for baby boomers experiencing midlife career switches. The book leads readers step-by-step through the process of determining and verifying Personality Type. Then it identifies occupations that are popular with each Type, provides helpful case studies, and offers a rundown of each Type's work-related strengths and weaknesses. Focusing on each Type's strengths, *Do What You Are* uses workbook exercises to help readers customize their job search, ensuring the best results in the shortest period of time.

"This is one of the most popular career books in the world. It's easy to see why. Many have found great help from the concept of Personality Type, and Tieger and Barron are masters at explaining this approach to career choice. Highly recommended." --Richard N. Bolles, author of *What Color is Your Parachute?* "A revolutionary way of finding the right job. Every job hunter or career changer needs this book." --Kevin Harrington, Career Services, Harvard Graduate School of Education "Offers an easy way to discover some extremely useful information about your Personality Type. When you are armed with this new self-awareness, the directions toward your own job and career satisfaction become clear." --William Corwin, Office of Career Services, Princeton University

About the Author Paul D. Tieger and Barbara Barron are internationally recognized experts on and the authors of five breakthrough books about Personality Type, including the one-million copy bestseller *DO WHAT YOU ARE*, which changed the way career consulting is practiced all around the world. They have been training professionals in the use of Personality Type for 32 years. Kelly Tieger graduated from Sarah Lawrence and has been exposed to Personality Type her whole life. She contributed research to the fourth edition of *DO WHAT YOU ARE*.
