James T. Stevens : Don't Get Caught With Your Pantry Down before purchasing it in order to gauge whether or not it would be worth my time, and all praised Don't Get Caught With Your Pantry Down:

0 of 0 people found the following review helpful. Still a great book By James Jones Great read 0 of 0 people found the following review helpful. Verified Purchase By Kindle Customer This is a book of lists, period. As a checklist book its good but for a book on how to build up a pantry it is not. 6 of 10 people found the following review helpful. Good checklists, some outdated info too many scare tactics By A Customer I was pleased with about the first five chapters of this book containing lists on how to put together a 72 hour kit, and how to stock a pantry, a system that prepares you for more than just Y2K, (eg. being out of work for a period of time). When it came to looking up some of the resources listed however, particularly readiness books available, I was disappointed. Of 32 books that I was interested in buying, 16 were out of print, three were not available anywhere that I could find, and others had outdated and

obsolete information. I feel "Pantry" also employs far too many scare tactics, and was disconcerted to see canning and gardening books listed alongside books demonstrating the how-to's of using the black market, looting, ambushing, poaching, and searching through dumpsters for food! I think by far the problem facing us in 2000 is no longer the millenium bug so much as the increasing panic generated from reading books such as "pantry" that employ scare tactic methods (undoubtedly for the purpose of persuading you to buy the products advertised throughout the book). I bought "Pantry" in search of pantry and canning resources and information. My advice: If you want information and have access to the internet, do a search for Y2K, Pantry, Canning, etc and find plenty of resources and info, some of which, if you are still inclined to prepare, carry supplies and pantry kits at far lower prices than those advertised in this book.

Pantry! The ultimate reference guide for personal and family preparedness. This newest and most informative guide is designed to help consumers find the required preparedness resources--information, products, emergency supplies, long-term storage foods, foodstuffs, items of equipment, and services--all items necessary to achieve any level of personal, family, or organizational preparedness. Year 2000 Computer problem: What the Y2K problem is, how to understand it, and where to find expert resources. In-Home Storage Plan: Getting pantry-ready; planning a food supply; finding acquiring food; managing long-term storage. Emergency Action Kit: What to include, how to be ready for danger, and how to find products you need. A preparedness Library: Books, periodicals, audio video, internet e-mail, AM/FM/SW broadcast. Household Preparedness Notebook: Fill-in-the-blank completion, identify personal family records, preserve information vital documents. Gold Silver: Why buy precious metals, what to acquire for future security, what to do with them. Preparedness Marketplace: 5,000+ preparedness products suppliers, includes retailers, distributors, manufacturers, listed by Zip Code. FEMA Disaster Resources: Complete listings of: Free publications, teaching aids, low-cost videos, promotional training information. State Resources: How to contact State agencies, how to utilize the Agricultural Extensions, how to find disasters educational resources. Federal Resources: How to contact Federal Agencies, how to identify Federal agency resources, how to get free and low-cost materials.

An indispensable resource for today's wacky--and dangerous--economy. More than twenty years ago, Stevens put together Making the Best of Basics--Family Preparedness Handbook. It sold over 300,000 copies, and was aimed at the urban family and dealt with preparing for difficult times by understanding in-home food storage and all the necessary quantities, items, recipes, problems and solutions. [...] Don't Get Caught with Your Pantry Down is a nuts-and-bolts, definitive look at the elements and the processes of protecting yourself. -- The Book Reader, 1998
About the Author James Talmage Stevens has been a preparedness teacher and writer for 25 years. His first book "Back To Basics: A Family Preparedness Handbook" has sold over 400,000 copies. His newest book, "Don't Get Caught With Your Pantry Down", is a complete guide to preparedness resources.
