Lee J. Ames : Draw 50 Sharks, Whales, and Other Sea Creatures: The Step-by-Step Way to Draw Great White Sharks, Killer Whales, Barracudas, Seahorses, Seals, and More before purchasing it in order to gage whether or not it would be worth my time, and all praised Draw 50 Sharks, Whales, and Other Sea Creatures: The Step-by-Step Way to Draw Great White Sharks, Killer Whales, Barracudas, Seahorses, Seals, and More:

1 of 1 people found the following review helpful. Best book on learning to draw sealife on the market!By

AngeloftheseaI bought this book for myself. Being a marine life artist, I'm not embarrassed to admit that sometimes I do have trouble drawing marine animals. Drawing them in onto my canvas and getting them anatomically correct can be tricky. I saw this book on and I must say IS worth every penny! Glad to give it a shot! Because of this book, I can now draw sea animals much better than I could before. I must thank the author for creating such a wonderful book. He makes it so EASY! I had no idea that drawing my subjects could become so easy...and FUN! The wonderful thing is this book contains 50 sea animals to learn to draw, which is GREAT! This is my first and only Learn to Draw 50 books, and I must say how much I recommend these for children and adults. There is no age limit. You're never too old to learn how to draw something...and an easy, easy way! This book is the way to go! I am so happy with this book! Now I will have no problems drawing anymore. This book is a lifesaver for me, and now I can draw so many kinds of sharks, whales, dolphins, rays, ocean fish, even squids and octopus! There is no other better book than this one anywhere! No other book will teach 50 animals, in a more easy way than this! Grab yourself a copy before they sell out!0 of 0 people found the following review helpful. Four StarsBy ShalviaPretty good instruction. Sadly, does not have a whale shark.0 of 0 people found the following review helpful. great booksBy Richard JarboeGreat books, go see what they have , ,great prices too.

Lee Ames, together with Warren Budd, present 50 inhabitants of the deep in step-by-step sketches. "Includes no less than 11 kinds of sharks and 13 animals of the whale family." -- School Library Journal.

From School Library JournalGrade 3 Up-- Having done a how - to - draw book on just about every conceivable animal, cartoon subject, and moving machine, Ames now turns his attention to drawing sea creatures. He begins with a page of instruction that encourages readers to go slowly and draw lightly step-by-step, keeping a soft eraser at hand. He asks readers also to watch the empty spaces around the lines in order to promote accuracy, and to use a mirror to view the drawing, making mistakes more obvious. This collection includes no less than 11 kinds of sharks and 13 animals of the whale family. The remainder of the 50 animals shown are of a variety of sea creatures. For collections in which it's hard to keep Ames' many titles on the shelf, this is one to consider. --Patricia Homer, Lowville Academy, NYCopyright 1990 Reed Business Information, Inc.From the PublisherLee Ames, together with Warren Budd, present 50 inhabitants of the deep in step-by-step sketches.
