Ulrich Reimers : DVB: The Family of International Standards for Digital Video Broadcasting (Signals and Communication Technology) before purchasing it in order to gage whether or not it would be worth my time, and all praised DVB: The Family of International Standards for Digital Video Broadcasting (Signals and Communication

Technology):

This second edition provides first-hand information about the most recent developments in the exciting and fast moving field of telecommunications media and consumer electronics. The DVB group developed the standards which are being used in Europe, Australia, Southeast Asia, and many other parts of the world. Some 150 major TV broadcasting companies as well as suppliers for technical equipment are members of the project. This standard is expected to be accepted for worldwide digital HDTV broadcasting. This book is readable for non-experts with a background in analog transmission, and demonstrates the fascinating possibilities of digital technology. For the second edition, the complete text has been up-dated thoroughly. The latest DVB standards are included in three new sections on Interactive Television, Data Broadcasting, and The Multimedia Home Platform.
