F. Benedetto Mattia : Elsevier's Dictionary of Acronyms, Initialisms, Abbreviations and Symbols before purchasing it in order to gage whether or not it would be worth my time, and all praised Elsevier's Dictionary of Acronyms, Initialisms, Abbreviations and Symbols:

This dictionary sheds light on the intricate world of acronyms, initialisms, abbreviations, symbols and codes. It includes over 10,000 of them and covers over 500 fields and subfields. The French and Italian abbreviations included have the English equivalents. The dictionary is supplemented by useful appendices with hundreds of additional acronyms and initialisms of banks, research institutes, centres for promoting studies, foundations, fellowships etc., which are now in current use. This dictionary is an indispensable tool in the everyday professional life of students, biologists, engineers, translators, scholars, physicians, physicists and many more. It is also of immense value worldwide to researchers and computer users, as well as to all those people interested in keeping abreast of developments, particularly in science and technology.
