AugustineI ordered this book from , because my sons had literally wore the spine off of this book...we had purchased the first book at a bookstore while on vacation and they absolutely loved it. It is has the perfect context for a 4-8 year old imagination with information in the form of statements that start with "I didn't know that...". Example, "I didn't know that sperm whales have the largest brains of any animal." I remember one time we sat down and read chapters of this book for 90 minutes straight...my oldest son was only 4 at the time and it kept his attention for that long and probably would have longer if mommy had not got tired.If I could only choose one book to recommend buying for a younger child, I would recommend this book. My oldest son calls it his "big book of everything." I have a feeling that before my sons outgrow this book, I am going to end up having to purchase another copy to make up for this one being used so much.I have two sons and they both have enjoyed this book tremendously. This is one of the few books that not only entertain my sons, but that I also find enjoyable to read with them.1 of 1 people found the following review helpful. Son loves thisBy Kindle CustomerMy son loves this book. He likes looking at the pictures and having you read to him. The book also hides little pictures on each page and he likes finding them. He is 3.0 of 0 people found the following review helpful. Great book for kids that love animalsBy Kitty J LloydIt has little games that teach them to count and look for

items on a page. So glad I bought it.
